dariorasero

General warnings and conditions of use

Applicable to all dariorasero® products and to products distributed by Euro Satip Srl
Euro Satip Srl, Via Nicomede Bianchi 109, 10146 Torino · info@dariorasero.com · +39 011 74 92 922

READ BEFORE USE

These warnings apply together with the instructions for each product. Keep them for the whole life of the product and make them available to every operator.

1. INTENDED USE

- Professional utensils intended for adult, trained operators. Use the products only for their intended use and under the conditions stated in the instructions for use and in the declaration of compliance.
- Keep out of the reach of children.
- Any use other than the intended use is improper and is not covered by the warranty; foreseeable improper uses are stated in the individual instructions.

2. SYMBOLS USED IN THE INSTRUCTIONS

Caution | Risk of cuts | Hand crushing | Heat / hot surfaces | Wear gloves | For food

CAUTION

Instruction to be followed to avoid injury, damage to the product or contamination of food.

NOTE

Useful information for correct use, hygiene or product life.

PROHIBITED USE

Uses to be avoided: they are not intended by the manufacturer and are not covered by the warranty.

3. FOOD CONTACT

- Suitability for food contact applies only to the items listed in the relevant declaration of compliance and only under the conditions stated therein (types of food, contact times and temperatures).
- Other uses are not covered: for example cooking, oven, microwave, prolonged contact, temperatures or foods not stated.
- Items without the "for food" symbol or not listed in a declaration of compliance must not be used with food. OZ line items are not intended for food contact.

4. USE IN OTHER SECTORS

- The products are also used in the chemical, pharmaceutical and industrial sectors. For these uses, the user chooses the material best suited to the substance to be handled; Euro Satip provides information on materials on request.
- Items intended for food must be kept separate from those used for other substances.

5. INSPECTION BEFORE USE

- Inspect the product before each use. Do not use items that are cracked, chipped, deformed, corroded (pitting, rust), with burred edges or with a damaged coating: replace them.
- For can openers, also check the fastening of the base and the condition of the blade and wheel.

6. HYGIENE

- Wash before first use and after each use according to the instructions; dry and store in a clean, dry place.
- For sanitising, use products approved for food-contact surfaces, observing the manufacturer's doses and times, and rinse with drinking water. Unless otherwise stated, do not use metal scouring pads, abrasives, solvents, bleach or unrinsed chlorine-based products.
- Wash utensils when changing food, particularly where allergens are present.
- Hygiene procedures, cleaning frequencies and the food safety plan based on HACCP principles remain the responsibility of the food business operator using the product.

7. SAFETY

-  Blades, toothed wheels, teeth and the edges of opened cans are sharp or pointed: handle them with care and wear cut-resistant gloves (EN 388) during cleaning and when replacing spare parts.
- On devices with moving parts (can openers, portioners), keep fingers away from the crushing points indicated in the instructions.
- Do not use the products as levers or hammers, or for any use other than the intended use.
- Where combustible dusts are present, aluminium utensils striking rusty steel can produce sparks: take this into account in the explosion risk assessment required by the applicable legislation.

8. OBLIGATIONS OF THE PROFESSIONAL USER

- The employer who makes the products available to workers informs and trains them in their safe use, provides the specified protective equipment and includes the risks described in the instructions in the risk assessment, in accordance with the occupational health and safety legislation in force in the country of use.
- Fill scoops, measures and containers to a level suited to the operator's strength and to the material; on long shifts, alternate hands. The employer assesses the risk from manual handling and repetitive movements.
- The instructions must be kept for the whole life of the product and made available to every operator.

9. SPARE PARTS AND MODIFICATIONS

- Use only original spare parts. Modifications, unauthorised repairs or non-original spare parts void the declared compliance and the warranty.

10. WEAR

- Wear of blades, wheels, working edges and coatings due to use is normal and does not constitute a defect; periodic replacement is the user's responsibility.

11. WARRANTY AND LIABILITY

- The warranty does not cover defects or damage to the product due to: use other than the intended use, failure to follow the instructions, inadequate cleaning or maintenance, incorrect storage, modifications, unauthorised repairs or non-original spare parts.
- Euro Satip Srl is not liable for damage arising from such causes, to the extent permitted by law. This is in any case without prejudice to liability for damage caused by defective products and to the rights granted to consumers by law, including the legal guarantee of conformity owed by the seller.

12. REPORTING

- Report without delay to info@dariorasero.com any incident, defect or anomaly, stating the item code, date of purchase and a description of what happened, with photos if possible.

13. DOCUMENTS

- These warnings form part of the instructions for each product. Updated versions are published on dariorasero.com. Declarations of compliance are sent with the shipping confirmation.
- In the event of any discrepancy between language versions, the Italian version prevails.
