

Professional fish scaler

Descales thoroughly without cutting into the flesh

DARIOFASERO

Professional fish scaler

Three colour variants for workstation coding

Professional fish scaler for fishmongers, catering and kitchens: thoroughly descales fish of any size without cutting into the flesh, thanks to the rounded profile of the head.

1. Main hollow cones

Hollow conical teeth catch and lift the scales in a single pass, from tail to head. The recessed tip guides the scale as it detaches, even the largest and hardest ones.

2. Finishing combs

Two side combs and one front comb, serrated, for the tricky areas: base of the fins, belly and dorsal line. They also refine the surface cleaning of the flesh.

3. Ergonomic handle with collar

Polypropylene handle with collar: a firm grip even with wet hands. The hanging hole allows the tool to be stored on the wall of the workstation.

4. Food-grade aluminium head

Aluminium head suitable for food contact, with a rounded profile that works on the skin without cutting into the fillet.

SKU 3460RD

SKU 3460RD

SKU 3460AZ

SKU 3460BL

Total length	200 mm
Weight	45 g
Head	Food-grade aluminium
Handle	Polypropylene (PP)
Hanging hole	Yes
Origin	Italy

Hand wash with neutral detergent; avoid aggressive alkaline dishwasher detergents.

SECTORS OF USE

Fishmongers · Catering · Professional kitchens · Delis

Professional fish scaler
