Round aluminium scoop 160 ml

SKU 2012 · Light weight and abrasion resistance

Round 160 ml food-grade aluminium scoop, made in Italy, for precise dosing of powders and additives, abrasive ones included. Light and sturdy, with better abrasion resistance than plastic.

1. The most compact in aluminium

160 ml: for precision sampling of cement powders, aggregates and sands, or of spices and yeasts in small doses.

2. Superior abrasion resistance

Unlike plastic it copes with cement dust, aggregates, sand and gravel: the tool of materials testing laboratories, cement plants and foundries.

3. Penetrating edge

It eases entry even into compacted material, reducing the effort needed. Non-slip texture on the handle.

4. Pressed aluminium, inert

It absorbs neither odours nor flavours and is unaffected by heat. Hand wash with neutral detergent.
