

Bonzer® Universal Blade with Screws

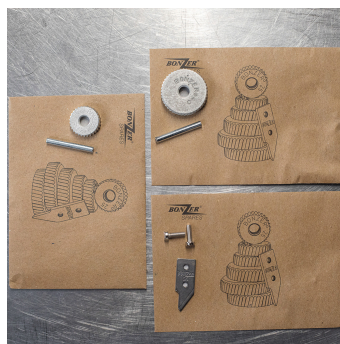

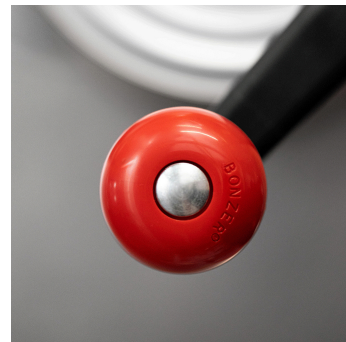

Hardened steel, standard on the Classic R

DAVIDRASEO

Bonzer® Universal Blade with Screws

Hardened steel · original spare part · dariosero SKU 0119

Original Bonzer® spare blade in hardened steel, complete with fixing screws. Shaped profile for easy, clean can opening, with quick installation by the user.

1. Standard part of the Classic

This is the hardened steel blade factory-fitted on the Bonzer® Classic R (code 10069-01). All Bonzer® blades have the same dimensions: mechanically it also fits EZ20, EZ40, EZ60 and Titan, which however leave the factory with the AISI 301 stainless steel blade (code 10069-02, SKU 0119SS), recommended so as not to lower their hygiene level.

2. Hardened steel

The standard, economical solution, suited to daily use of medium intensity.

3. Wear part

Blades and wheels wear with use: periodic replacement restores the performance and efficiency of the can opener.

4. Replaced in seconds

Loosen the screws, fit the new blade with the stamped side towards the release mechanism and tighten the screws again.

SKU 0119

Material	Hardened steel
Fixing screws	Included
Position in exploded view	6 · Blade
Manufacturer code	10069-01
Type	Wear part
Pack	1 piece
Dishwasher	No

0119 · Universal blade with screws

dariorasero SKU	0119
Manufacturer code	10069-01
Position in exploded view	6 · Blade
Material	Hardened steel
Fixing screws	Included
Functional assembly	Cutting group
Type	Wear part
Net weight	20 g
Dishwasher	No — hand wash and dry immediately
Origin	UK
Pack	1 piece

Bonzer® blades are identical in size across the range and therefore interchangeable between models.

Standard on the Classic R. On EZ20, EZ40, EZ60 and Titan the standard blade is stainless steel (0119SS).

Never sharpen the blade: a sharpened blade leaves cutting edges.

Mitchell & Cooper Ltd: ISO 9001:2015 · ISO 14001:2015 · Sedex Supplier Plus — Made in Uckfield, UK

Blade replacement

Bonzer® Can Opener Wall Guide — Blade fitting

Replacement sequence

Valid for all models: the blade is fitted the same way across the range

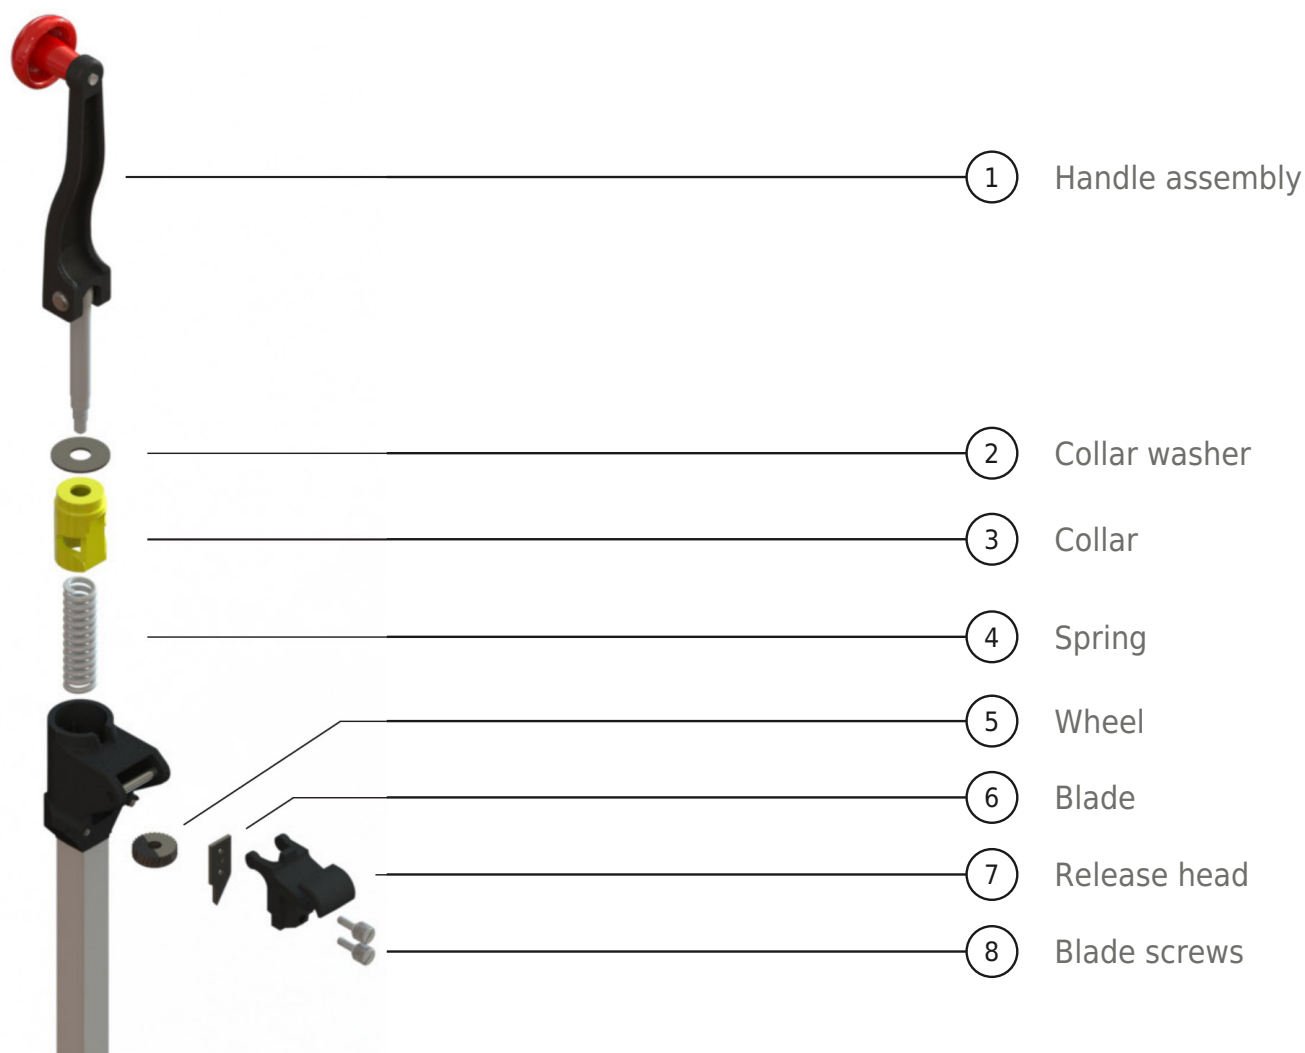

- 1 Loosen the screws to free the blade.
- 2 Fit the new blade with the stamped side facing the release mechanism.
- 3 Refit the screws and tighten them.

Never sharpen the blade: a sharpened blade leaves cutting edges.

Replace chipped blades.
