

Zeroll® Original 20

Gelato scoop

DARIOZERO

Zeroll® Original 20

Gelato scoop · SKU SC1020

Zeroll® Original gelato scoop, Made in USA, distributed for Italy by dariosero®. The heat-conductive fluid in the handle carries the warmth of the hand to the bowl: easy scooping even of the hardest ice cream, effortlessly.

1. Heat-conductive fluid in the handle

The sealed fluid in the aluminium handle carries the warmth of the hand to the bowl: easy scooping even of hard ice cream, with no hot water and no effort.

2. One piece, no springs

A single piece, with no moving parts or springs: it forms the perfect ball with a simple turn of the wrist.

3. Up to 20% more servings

Rolling instead of pressing removes compression: up to 20% more servings per tub, with higher yield and profitability.

4. Colour coding and tough alloy

The colour of the cap identifies the size for constant portion control; the aluminium alloy resists oxidation and corrosion.

SKU SC1020

Manufacturer code	20
dariosero SKU	SC1020
